Election/Restrictions

Applicant's election without traverse of Group I (claims 12-21) in Paper filed 6/2/03 is acknowledged.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-18, drawn to a semiconductor device, classified in class 257, subclass 678.
- II. Claims 19-21, drawn to a semiconductor device, classified in class 257, subclass 713.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an edge including a first cut portion and a second broken portion. The subcombination has separate utility such as used in an electronic device having exclusively one semiconductor dice.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2823

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Estrada whose telephone number is (703) 308-0729. The examiner can normally be reached on Monday through Friday.
